Furnishings:

- Stove with water jacket
- Stones for the stove
- Custom-made benches
- Harvia's steel chimney
- Water bucket and ladle
- Bench towels
- Thermometer

TRADITIONAL BARBEQUE HUT FOR VERSATILITY

For centuries, the people of Lapland have wandered to maintain their livelihood and lived their lives within the walls of Lapland-style huts. New generations have been born in those huts, and they have provided shelter against the frigid northern winds. Within those walls, traditions have been passed on from one generation to the next, and families and friends have entertained themselves there. We have refined the Lapland hut into a place suitable for today's needs, while at the same time we have respected the traditions upon which the huts have been built. For this reason, we feel the only real Lapland hut is one that has been made completely in Finland, from the raw materials used to the production and installation of the huts.

We manufacture all of our huts in our own factory in Tornio, Finland. We use northern, slowly grown, densely-grained and durable pine as our raw material. It is a construction material that is well-known and highly-valued around the world. Deliveries include everything you need, from bottle opener to reindeer skins.

We deliver and install our products on site according to the turn-key principle. All you have to do is lay the foundation. Our own construction team ensures that the quality of the product is maintained during transportation and that the hut is constructed in place correctly and with care.

Our quality huts are versatile. They can be used as backyard barbeque huts, for having get-togethers, as forest get-aways, or as rest areas when hunting, hiking, or doing other outdoor recreation. You can enjoy pleasant moments relaxing beside a warm fire, whether you are one, two or a large group. The sauna hut is a place where you can relax in the caressing steam; it has been constructed using the appropriate dimensions for the size of the sauna stove, so the steam is just right.

When you want quality, give us a call or send us an e-mail. Let's discuss an alternative that's right for you. Have a look at our products on our website.

TIMÄPUU
www.timapuu.fi

Timapuu Oy Marttila is a family-owned business established in 1995. We have been an incorporated company since 2000. Our factory is located in Tornio, in Finland's Lapland region, and we employ about 15 people. We focus particularly on the high quality of our products and the satisfaction of our customers, something that has been recognized abroad as well. Timapuu Oy has manufactured thousands of barbeque and sauna huts. Approximately half of our output is exported to various places in Europe, such as Sweden, Norway, Germany, England, and France.

FINNISH BARBEQUE HUT FOR QUALITY TIME

GOOD TO KNOW

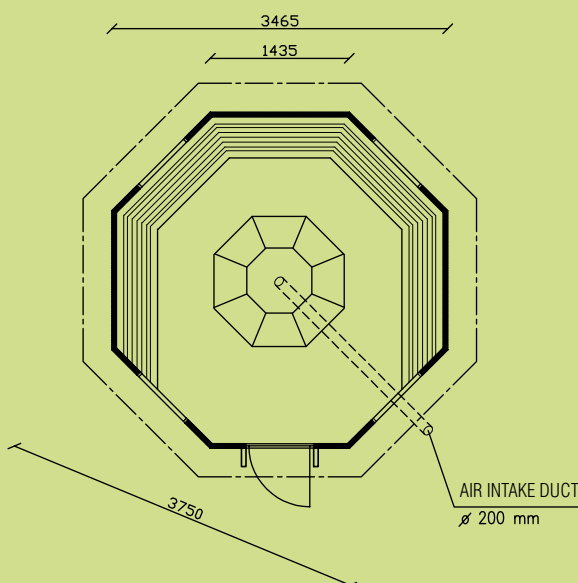

Here's how to make the correct type of foundation for your hut.

Cement foundation

Begin making the slab by putting a wooden peg in the middle of the presumed slab. Attach a string 1,875 mm in length to the peg and rotate it until you have marked all 8 sides of the octagon shape. Use a wood measure 1,435 mm in length to help you. NB! Check the diameter; it should be 3,750 mm. Set an air inlet duct, made of sheet metal or plastic with a diameter of 200 mm, into the foundation. One end should be under the grill and the other one should be directed out of the hut.

Light foundation

Sand, gravel or stone ash bank.

EASILY AND READILY CONSTRUCTED

Construction of the hut in your yard can be included in your order. Just ask!

HIGHLY-VALUED RAW MATERIAL

We manufacture our huts from northern, densely-grained pine, which is a highly-valued construction material around the world. When wood grows slowly, it develops a dense grain, which makes it extremely weather-resistant. We use building timber that is 45 mm thick for the wall structures of all of our huts, which keeps the huts standing firmly for years to come. Demand the best!
